## **Company Profile**

### **History and background**

**The Company Batty Hamood Khanfoor Transport Services** established in 1985 and registered with PDO as a Local Community Company. The company is owned and managed by Mr. Batty Hamood Khanfoor Aldaree.

The Company was setup with the help of PDO's local community business development program, whose strategy to encourage local citizens living within the PDO concession area to develop & buildup their own companies

The head office located in Muscat Falaj Alsham and operation office is located at Nahada near PDO's booster station on Fahud Road.

At present company's business is to provide Oilfield services i.e. vehicle and equipment rental, fuel haulage, water haulage and waste management services as well as manpower supply to PDO's contractors.

## **Health, Safety & Environment**

## "A Commitment that Endures....."

Our ultimate aim is no accident, no harm to people and no damage to the environment. Not surprising then that we have, ever since our conception in year 2000 put HSE concern at the forefront of all activities. In addition to the management and supervisors, each employee too, works to ensure that all the safety policies and procedures are strictly implemented and followed.

A well-documented HSE manual and operating procedures enable the company to achieve high standards of performance, for which the company has been recognized and awarded by PDO for its operations.

To ensure safe working conditions for the crew, the following actions are taken on a periodic basis, on the principal of its HSE management system, which strives to

- Safeguard the health & safety of the people to the highest degree and to maintain the natural state of the environment in which the company operates.
- Recognize HSE as a management responsibility.
- Comply with all rules, regulations and standard.

To achieve the above the company has made the following :

- Safety of Equipment / Vehicle
- Absence of risk in handling of equipment.
- Sharing of information / Training / Instruction to ensure Health & Safety .
